### Mote.

Mote responds to the demands of dynamic work environments; versatile, reconfigurable spaces for meeting, learning, focusing, or relaxing. No detail is an afterthought, with every inch having been given careful consideration to reclaim redundant space.

Ottomans are offered in five variants, corresponding to the footprint of each sofa unit.

With dimensions and upholstery detailing mirroring the sofa, the two can be used in-line. The ottoman's distinctive seat profile allows users to sit from either side. Combined with optional power, Mote ottomans become a social hub for informal interaction and on-the-fly charging of mobile devices.

## Sofa.

Mote sofas are offered in three lengths - single, two-seater and three-seater – alongside angled units that can be used in isolation, or as modular blocks. Seat and back in multi-density reflex foams, with a distinctive

central fly detail offering visual

continuity between adjacent units.

## Screens.

Optional upholstered screens attach to each sofa. The straight back screen offers partial seclusion, with back and side screens offering increased privacy.

Straight or angled bridging screens span adjacent sofa units to create semi enclosed settings and vertical surfaces for mounting of displays and whiteboards.

Arm modules add comfort and serve as a natural boundary between strangers sharing space. Side arms and mid-arm modules are offered as separate options. Distinctive die-cast power modules deliver power adjacent to each user and are available at the front and rear of each sofa or ottoman.

### Hooks.

Optional hooks offer hanging space for coats and bags to keep personal effects off the floor and close to hand.

Made using precision cast alloy with a silent soft close return.

# Workshelf.

The workshelf reclaims otherwise redundant space for touchdown working. The shelf's scalloped profile offers integral routing for cables to optional power outlets positioned below. Available to fit each screen variant, and offered in a variety of finishes.

### Stool.

A versatile and cost effective accessory to complement larger reconfigurable meeting spaces. Sharing seat height and upholstery detailing with the sofa and ottoman units, the stool also features a woven tape handle for easy manoeuvring.

## Meet, retreat.

The Mote family effortlessly works together to create a combination of rectilinear and curvilinear forms for beautiful and defined spaces.
